

Paper Miniatures by ComStar Games

Our paper miniatures are full color and stand 1.5 inches tall and .75 inches wide when assembled. They come with fully illustrated instructions and are easy to assemble. Just print, cut and fold, and your all set to go.

Illustrated Instructions

Cardstock miniatures instructions:

- 

First you are going to need a couple things. Either scissors, or an exacto knife, something to cut on, and a straight edge.
- 

First cut out all the pieces, using either the scissors or the exacto knife. Cut all the black, but do not cut the gray dotted lines.
- 

Using the straight edge fold the pieces on the dotted lines. After the initial folds are done you can fold them in the proper direction opposite the picture.
- 

Fold the two base pieces together and slide two flaps between each other to lock into the miniature in place.
- 

At your option if you want to hold the piece together permanently, and weight it down so it stays upright, you can tape it together with a weight. My preference is a penny, they are cheap and plentiful.
- 

Voilà! Your piece is together and perfect. Now continue with this same process for each piece.

Spice up your next game with these paper miniatures. We currently have superheros and anime, but more will be added in the future.
